DETAILED ACTION

REASONS FOR ALLOWANCE

Claims 1, 3-12, 29 and 31-32 are allowed.

The prior art does not teach or suggest a cell including all of the claimed features. The most pertinent art includes Yamazaki et al. (U.S. Patent No. 6,32,538 B1) and Aaltonen et al. (U.S. Pub. No. 2003/0108786 A1).

Both the Yamazaki et al and Aaltonen do not teach or suggest a holder assembly forms an attaching portion and a non-attaching portion, both of which are formed by the periphery of the holder assembly, and the cross-sectional area of the attaching portion is smaller than that of the non-attaching, and the plastic protective layer is coated on the attaching portion and not on the non attaching portion as claimed by Applicant in claim 1. Furthermore, Applicant specification states that, "referring to the first holder 4A shown, the size of the attaching portion 4a, which is a part of the periphery that is coated with the adhesive solution 20 to provide a plastic protective layer 1 thereon, is slightly smaller than the size of the non-attaching portion 4b on which the plastic protective layer 1 is not provided. The holder 4 can have the plastic protective layer 1 bonded thereto without causing exfoliation of the plastic protective layer 1" (Paragraph 0042) of Watanabe et al. 2004/0241541 A1.

For these reasons, the claims are allowed over the prior art. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "comments on Statement of Reasons for Allowance."
